

Mark Coady, Director, Publicity and Light Pollution Abatement for the Peterborough Astronomical Association and a member of the National Light Pollution Committee for the Royal Astronomical Society of Canada presented Smith-Ennismore-Lakefield Reeve Ron Millen with a plaque Tuesday evening recognizing the township's efforts towards light pollution abatement. The township's noise and property standards bylaws contain light pollution abatement clauses, Mr. Coady said, and the township has committed to adhering to recommended standards with new and replacement lighting.
